# New Phones Coming Soon!

**New phones that will make our old phones seem, well, old.**

We're combining our data and voice networks to better communicate with all of our corporate locations. As a result, we're getting new Cisco IP phones with great features like:

- Large color LCD display and high quality speaker for all phones
- Enhanced voicemail with speech connect
- Call history to view missed, received, and placed calls
- Access to the corporate phone directory
- Access voicemail through your Outlook email client
- Connect with business associates at our other corporate locations through video calls

**Welcome to the Voice Strategy Project. Coming soon to your location.**
