

SAP Customers Streamline HR Cloud Migration

Transition planning service for HXM solutions from SAP delivers faster time to value

Organizations across every industry are embracing cloud solutions to take advantage of their flexibility and business agility. For HR processes, a modern, cloud-based solution such as SAP® SuccessFactors® Human Experience Management Suite can enable companies to:

- Streamline and integrate HR and connected processes such as financial data supported by employee records
- Champion a connected and engaged workforce that is measurably more productive and delivers improved customer outcomes
- Promote a learning culture that drives ongoing business and experience improvements to adapt to changing market conditions
- Enable an agile workforce through mobile and rapid access to end to end employment information

The SAP Services and Support team can help organizations seeking to migrate to modern and cloud-based solutions unlock faster time-to-value and long-term adoption to achieve their strategic goals.

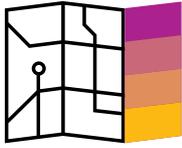

Unlocking Real HR Outcomes

HR teams around the world have applied SAP solutions to better streamline and integrate their processes and keep employees engaged.

.....

“SAP SuccessFactors Digital Business Services team helped transform our business from a disparate and paper-based system to a cloud. We worked together to design the project to enable our teams to provide ongoing improvements to our end clients and ultimately deliver better return on investment and profits to our group.”

–HR Director

Travel and Hospitality Customer

For this major hospitality group, SAP assisted with implementation of SAP SuccessFactors modules in phases from 2016 through to 2019. SAP enabled the organization to:

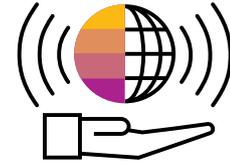

- Update disparate legacy tools to cloud technology
- Enhance customer end user experience through management of staff using leading HR practices

Retail Customer

SAP provided guidance to a major retailer with nearly 200,000 employees to help the organization move beyond complex, manual, and aging HR processes. The SAP SuccessFactors Employee Central, Employee Central Payroll, and Talent Management package provides:

- A single, centralized view of master data for employees at all levels, streamlining daily decisions about the workforce
- Employee access to online records of objectives and performance that follow them through the company
- Universal access to learning and personal data from mobile devices

Telecommunications Customer

SAP Services and Support assisted Japanese telecommunications giant on its digital transformation initiative for finance and procurement. SAP provided:

- Knowledge on industry best practices, cloud deployment accelerators, and critical on demand support to mitigate project go-live risk and ensure maximum adoption of cloud application post go-live
