

Accelerating Sustainable Impact

Become a purpose-driven, resource-sensitive company with **sustainability service package**

Today, sustainability is much more than something that's "nice to have."

It's increasingly top-of-mind for consumers, communities, and the companies that serve them:

Employees

are focusing their career choices on responsible employers.

The environment is a **top concern** among Millennials and Gen Z employees

Initiatives like **EU Circular Economy** are pushing more recycling costs to retail sector

Regulators

push legislation and taxation.

Consumers

are shifting preferences.

Sales of sustainable products are **rapidly accelerating**

ESG investment levels are escalating

Investment decisions

are driven by environmental risks and social data.

It's no surprise that **executives are making sustainability a strategic priority.**

Sustainability is good for business and the world

Become greener

Reduce their environmental footprint - CO2e, wastewater, and plastics -

Better align sustainability strategy and business

Achieve more transparency in sustainability KPIs

Ensure or improve worker safety

Adapt their portfolio to more-sustainable sourcing and products

Unlock tax incentives - Reduced CO2e tax payments in Europe -

Build targeted roadmaps to support sustainability strategy

Define the monetary value of sustainability

SAP has long demonstrated its commitment to sustainability.

SAP has developed a **comprehensive approach** to creating positive **economic** **environmental** and **social** impact.

SAP is:

An enabler

Providing **products and scope options** that can meet our customers' **sustainability challenges and opportunities.**

An exemplar

Leading by **example** through our own sustainable **business operations and practices.**

A focus on the **future**, creating valuable outcomes and experiences for:

Customers

Partners

Colleagues

SAP stakeholders

Our holistic enabler strategy includes:

Circular Economy

Enable responsible design and production

Sustainable packaging reporting, extended producer responsibility, and scenario modelling.

Example:

Reducing plastic waste for packaging materials

SAP Product Footprint Management solution

Example:

Driving greener automobile manufacturing

Reduce greenhouse gas emissions along the value chain

Focus on carbon footprint in product manufacturing.

SAP Product and REACH Compliance application

Drive resource efficiency, tracking, and reuse

Build resilience into supply chain, enabling sustainable principles in product, material flows, markets, and resource consumption.

Examples:

- Management of sustainable products
- Process and chemical compliance for process industries
- Safety data sheet and label management
- Dangerous goods management

SAP Environment, Health, and Safety Management

Example:

Risk reduction to foster safe operations

Protect people, communities, and societies

Help ensure continuous improvement in safe, equitable, and compliant businesses within the company and across the value chain.

Corporate Sustainability Reporting and Steering

Next-generation reporting steering

Map operational data to show impact with holistic sustainability reporting, enabling sustainable business steering and decisions.

Examples:

- Determining data center power usage
- Determining how much power is coming from renewable energies i.e. solar, wind
- Understanding how employees are traveling, and encouraging more efficient modes
- Gaining insights into target KPIs vs. actual KPIs

The sustainability service package provides a customer journey with multiple entry points for:

Sustainability advisory

Achieve a quick start by defining ambitions, use cases, and strategy.

Sustainability assessment

Develop a project roadmap and bridge the gap between strategy and execution.

Sustainability implementation

Maximize usage and adoption.
